Subject: Information request for Via verde project
Date: Wednesday, February 16, 2011 11:39:11 AM
Importance: High

Hello FOIA Exemptio -

The other week when we spoke I mentioned a request I had that we chat on discussions you may have had with EcoElectrica or FERC staff, etc. When you have an opportunity, would you please give me a call on my cell phone at 503.781.7930 so we can follow-up on this request? I would like to get as much information as I can in the next few days to prepare and provide you (the Corps) a response before the next PDT meeting on the following topics:

- * FERC discussions you have had and questions the Corps has on 1) connection to EcoElectrica, 2) natural gas delivery and project use calculations, and 3) any need for EcoElectrica to apply for a modification through FERC (or other regulatory agencies) at the existing LNG facility
- * Issues regarding the Federal lands the proposed pipeline corridor may cross, i.e. the Navy facility near Punta Salinas, etc. (you were going to contact your Real Estate Division on this issue and get back to us)
- * Gaseducto Del Sur - USFWS recommended we consider using the Biological Assessment submitted with this project as a model for the Via verde action. Previously I had asked if you could provide me a copy of the Corps' permit for the Gasedcutto Del Sur project. If you could please send the BA for that project, as well as the permit, to me ASAP I would appreciate it.

Since the next PDT meeting is quickly approaching, it would help me help you if you could contact me in the next 24-48 hours to we have time to put together information for discussion at the meeting.

Your attention and assistance in this matter is appreciated.

Best regards.

Lawrence C. Evans
